

Corn is grown in USA

Cornstarch is extracted from milled corn

Cornstarch is made into Green Cell Foam through extrusion process

Green Cell Foam is used to protect goods in package

Discarded Green Cell Foam fully biodegrades into the soil

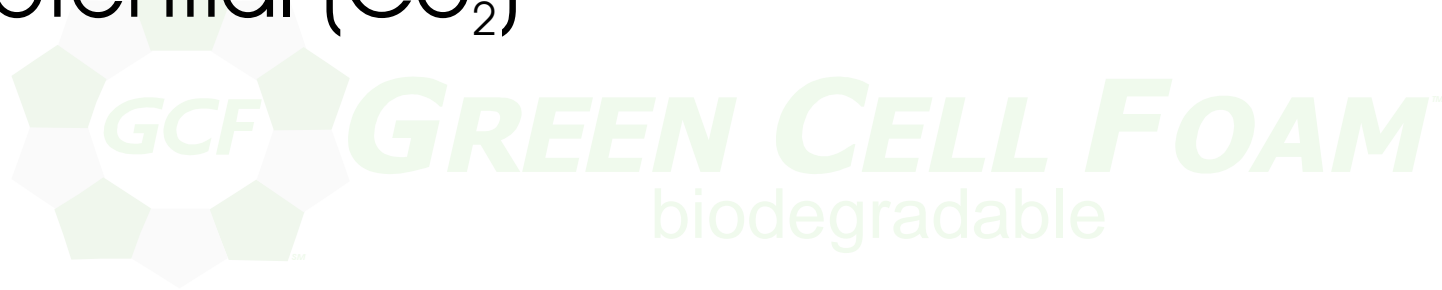

GREEN CELL FOAM™
biodegradable

vs. **Polyethylene**

★ **80%** reduction in global warming potential (Co₂)

★ **99.8%** reduction in ozone depletion

★ **69%** less energy requirements for production & disposal life cycle

★ **70%** less acidification of the environment
